

SEEDMIX COMBINATIONS 4.0

for COVAMATS

A selection of different seedmixtures guarantees the success for your projekt.

Not just one seedmix is suitable for every conditions throughout Europe. Therefore GREENFIX offers below mentioned seedmix combinations to meet the climatic conditions of your projekt. In addition special customer specified seedmixes (e.g.with Wildflowers,golf courses) are available on request.

SEEDMIX 1A:	low performing - non forage - specially for flood endangered areas and steep slopes, dikes and costal stripes - excellent sod-forming and erosion protective - strong root development – also salt resistant
SEEDMIX 2A:	standard fresh and moist ground - low maintenance - strong root development – erosion protective - also salt resistant
SEEDMIX 2B:	for dry and stoney underground - strong root development - erosion protection - also de-icing salt-resistant
SEEDMIX 1C:	as per seedmix 1A - with additional clover for poor soil conditions - most widely used mix
SEEDMIX 2C:	as per seedmix 2A - with additional clover for poor soil conditions
SEEDMIX P : - (Pioneer)	for specially poor soil conditions - soils with vegetation establishment problems erosion protection - strong root development and ground cover – de-icing salt resistant
