

Elevation

Arik Levy 2009

FLORA 

In his Paris studio, Arik Levy developed the Elevation concept. You can enter a green oasis in the middle of a group of these elements. So what is the idea behind this product? You are face to face with the world of plants, with your own reflection in the middle, or the fascinating honeycomb structure which allows the tendrils to climb and twist. Elevation is the green life, giving access to nature on a different level.

Elevation Giant

Arik Levy 2012

FLORA 

Big. Bigger. Biggest. The almost gigantic dimensions of this planter create new opportunities for outdoor structures and designs. Tall plants have a style all of their own when used for green architecture. The new types can be positioned on hard surfaces, and also used as moveable objects. Special features make it easy to handle the planters, which have a volume of approximately 900 litres.
