

## Elevation

Arik Levy 2009

**FLORA** 

In his Paris studio, Arik Levy developed the Elevation concept. You can enter a green oasis in the middle of a group of these elements. So what is the idea behind this product? You are face to face with the world of plants, with your own reflection in the middle, or the fascinating honeycomb structure which allows the tendrils to climb and twist. Elevation is the green life, giving access to nature on a different level.

## Planting inserts

Removable planter inserts made of high-quality aluminium are a standard fitting for every FLORA plant container, only the intended use determines whether a water-permeable or a water-proof insert is the right choice, the double-wall design, which creates a layer of air between the plant container and the planter insert, ensures that the root system is protected against heat and frost

# FLORA

### Using plants outdoors

Ventilation slits for oxygen in the root systems, water reservoir, insulating air layer for protection against heat, drying out or frost

### Using plants indoors

Watertight, light aluminium, optionally with water reservoir and water level indicator
