

Product Data Sheet

Gravel Retainer KL 60/80 + KL 100/120 + KL 140/160

Angle profile with drainage slots on both legs, made of extruded aluminium, handy for transport, usable on both sides.

Technical Data

Gravel Retainer

Edging profiles made of natural aluminium for the separation of different build-ups, e.g. gravel strip and vegetated area, strips of Zincolit® or similar.

Gravel Retainer KL 60/80

Order No. 7760

Gravel Retainer KL 100/120

Order No. 7765

Gravel Retainer KL 140/160

Order No. 7745

Material:

Natural aluminium AlMgSi 0.5 F22

Material thickness:

approx. 1.5 mm

Length:

approx. 2.0 m

Profile height KL60/80:

approx. 60/80 mm

Profile height KL100/120:

approx. 100/120 mm

Profile height KL140/160

approx. 140/160 mm

Accessories:

- Connector for KL 60/80:

Order No. 7907

- Connector for KL 100/120:

Order No. 7911

- Connector for KL140/160:

Order No. 7915

Welded preassembled corners available on request.

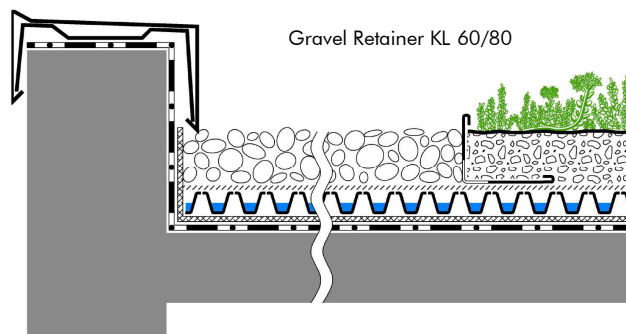

(Leg length of approx. 220 mm x 220 mm)

Features

- profiles usable on both sides, thus two heights are covered with only one product
- for the separation of build-ups with different heights respectively different materials
- slots on both legs for vertical and horizontal water runoff
- butt joint connectors for exact alignment available as accessory

Beispiel

„Enclosure of planting area“

Specification Suggestion

Angle profile made of extruded aluminium with drainage slots on both legs; material thickness approx. 1.5 mm (KL 60/80); approx. 1.8 mm (KL 100/120); 2.1 mm (KL140/160) (length approx. 2.0 m; profile height approx. 60/80 mm or 100/120 mm

or 140/160 mm; delivery and aligned installation including butt joint connectors.
